

# How to Download a File from Blackboard

Go to a class in Blackboard and click on an item you would like to download. (For this example, we'll use my Database II class)

You should see the document on a screen like this, click on the download icon in the top right. (It looks like an arrow going into a basket)

Once you click the download button, you should see something pop up on the bottom left of your screen. That's the file you just downloaded, clicking on it will open it.
